VIVEK CHANDRA

https://vivekchandra.in

Senior Developer at Siemens Industry Software India Pvt Ltd (on payroll of Pratiti Tech)
9.9 years of IT industry experience in web (frontend development) technologies and 6 years in full stack (NodeJS)
Developing Siemens's core web UI declarative framework called "Siemens Web Framework (SWF)"
I lookout to work and learn in an inspiring environment with focus on technologies which would aid maximum utilization of my broad skills and creativity.

Pune, India | +91-77******57 | vivekchandra007@gmail.com | https://in.linkedin.com/in/vivekchandra007

Profile Summary

- Core member of the team developing and enhancing Siemens' internal web UI declarative framework: "**Siemens Web Framework (SWF)**", on which Siemens industry PLM software products like Active Workspace (TeamCenter), etc are built upon. It is the backbone of Siemens' Cloud strategy, for building industry scale applications having modern and consistent layout, also not being prone to rapid changes in web technologies, via the framework's abstraction layer.
- Thus, I have extensive experience in architecting and developing
  - **Web**: HTML, CSS, **Javascript (ES6)**, **React** as well as AngularJS
  - **Server side** and bundling app: **NodeJS**, ExpressJS, NPM, Gulp, Webpack, Babel
  - CSS preprocessors: **SCSS**
  - Unit Testing: karma and Chai; BDD Testing: Basic Cucumber and Puppeteer
  - Version control: **Git** and **CI/ CD** in Gitlab
  - Basic configuration and scheduling of jobs using Jenkins
- Proficient in analyzing and translating business requirements to technical requirements & architecture, and leading initial wireframes to prototypes to a final product.
- We followed Scaled agile framework (SAFe) within our team for management.
- Previous experience of developing banking web application, using .NET (C#) for our **IBM US Client: Suntrust Bank Inc.**, with a team of 25 to 30 people.
- Experience in leading mid-size teams (5-6 people). **Handled role of Technical Lead at IBM**.

Education

2009 – B.Tech (CSE) from Uttar Pradesh Technical University (UPTU), India.

Career

Infosys (Jan'10 – Jun'13)

IBM (Jun'13 – Mar'18)

Siemens (Mar'18 onwards)

Skill Set

Frontend (UI/ UX) HTML, CSS, JavaScript (ES6)

Core Java

Algorithms

SQL/ NoSQL Database

JavaScript technologies and frameworks (React, AngularJS, Node.js, Socket.io, WEBRTC)

Cloud(IBM Bluemix & AWS) REST API Development

Roles and Responsibilities

- At **Siemens** (Current):

As a Senior Developer, developed Siemens Web Framework (SWF)

- It is a configuration first framework that lets you rapidly develop web applications with significantly less code to write, test, maintain and download at runtime. It follows top trends in the front-end development like component-oriented design, declarative coding, consolidation of state management, SPA and client-side routing & extensions via JS code to manage application complexity.
- We have made it declarative to make it agnostic to rapid changes to underlying web technologies frameworks. The framework takes care of those changes, like when we switched from gulp based bundling to webpack based, the framework customers didn't notice any changes except lesser time taken to build their app.
- I have personally worked in areas of build, bundling for increasing performance, refresh of UI & UX through modifying old and adding new components.
- Overall, I am part of the 20 members team, which uses SAFe (agile) methodology to build and maintain this framework, which includes it's core code base (as an internal npm package), supporting libraries, tutorials, support wiki and documentation.
- Identify work process improvements and implement new technologies.
- Utilize in-depth knowledge of functional and Technical experience in web technologies, especially frontend part in conjunction with industry and business skills to deliver solutions to customer.

Team Size: 20 to 25.

- At **IBM** (June 2013 to March 2018):

As a *Senior Developer*, responsible for analysis, design and development of banking web application (using HTML, XSL, JavaScript, .NET and ARGO Customization tool) for our IBM US customer *SunTrust Bank Inc*.
As a *Technical Lead*, responsible for mentoring and leading new team members to understand our client's application, process and deliver bug-free solution in every release, after proper review.

- It was a web-based app for use by Suntrust bank's employees at their branch or through phone.
- Translate customer requirements into technical ones and design documents, establish specific solutions, and lead the efforts including programming and testing that culminate in client acceptance of the results.
- Meet programming standards by following production, productivity, quality and IBM defined customer-service standards.
- *Key projects handled: AML (Anti Money Laundering) implementation, FATCA implementation and SNET upgrade*.

Team Size: 25 to 30.

Professional Certifications & other Achievements

- Won "Hackathon 2019" at Siemens and our team of 7 members is featured at Siemens' Pune office's Hall of Fame.
- IBM Certified Application Developer – Cloud Platform – v1.

- Received the prestigious "SPARK AWARD" by IBM for first half of 2017. It is given to very few across IBM who drive innovation and display excellence in behavior that helps IBM deliver client delight.
- Proposed next generation mobile to cash payment system during a Suntrust Bank's internal innovation event: "RISE", in 2015. We demonstrated the prototype and were among final 10 teams from all over the world.
- Received "IBM Deep Skill" award consistently for 5 quarters, eligibility of which is assessed each quarter. It is given for demonstrating proficiency in a high demand and IBM-designated critical skill.
- Received "IBM Manager Choice Award" five times for "Dare to create original ideas", "Show personal interest", "Unite to get it done", "Put the client first" and "Share Expertise". This award is given by managers to direct reports who demonstrate IBM values and practices.
